RISKS OF NONSECURE COMMUNICATION

Occasionally, it may be necessary for us to communicate outside of our scheduled sessions about scheduling and payment issues. Any e-mails and text messages that I send to you, and your direct replies to e-mail messages, will be encrypted and secured. If you'd like to communicate with me via secure text messaging, you can download and use the *Spruce* messenger app.

However, if you initiate communication with me by email or an alternative messaging system, please know that these are not, in their typical forms, confidential means of communication. These messages can be intercepted by a third party, including people in your home or other environments who can access your computer, phone, or other devices; your employer, if you use your work e-mail to communicate with me; and third parties on the Internet such as server administrators.

I have been informed of the risks, including but not limited to my confidentiality in treatment and of transmitting my protected health information by unsecured means.
